Make it Safer. Make it More Cost Effective.

Make it FLX!

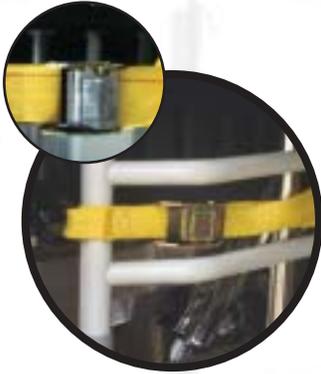

Cargo Body Specification & Options

Specifications subject to change and are designed to adhere to typical requirements. Check your state or community's specific requirements.

Straps for securing items to sidewall prevents damage and improves floor space usage.

Safety packages available with no smoking signs, fire extinguisher, triangular-flare kit, first-aid kit, back-up alarms and HazMat compliant placards. "Clean" and "Dirty" designated areas with signage to assist in meeting JCAHO guidelines.

Brackets and slats mounted on interior side walls provide secure storage areas to avoid clutter and damage.

Multiple access doors allow for easy access to the entire floor space and all equipment without getting into truck and unloading items unnecessarily.

False ceiling provides storage area for mattresses. This frees up floor space and prevents damage.

Custom decal installation provides a professional appearance and economical transit advertising.

Custom built aluminum shelving units with dividers provide protected and organized storage of medical supplies.

Two flood lights with rear switch for night deliveries.

Aluminum ramp allows easy loading of items like scooters by one person. Saving time and expense.

Aluminum bottle holders with access doors allow for easy access and storage of oxygen bottles. (E, M-6, D, G, H, Etc.).
